WD6 (Concrete and Timber Cavity) Installation Guide, Operating Instructions & Warranty

IMPORTANT!

This wood appliance must be installed to **AS/NZS 2918:2001** by a qualified person and in accordance with these instructions. Failure to install the appliance correctly will void your warranty and may cause a fire. This appliance should not be modified under any circumstances.

It is recommended that you have this appliance serviced annually by a qualified technician.

Warranty repairs must be carried out by a 'The Fire Dept.' authorised technician.

This appliance must ALWAYS terminate/flue outdoors.

Young children, elderly or infirm should be supervised to ensure that they are careful with the appliance.

Clothing and other flammable materials should never be placed near the appliance.

Please note that parts (near the flame) of this appliance become extremely hot during operation and can result in serious injury and burns if touched. It is therefore recommended that a fireguard complying with BS 8423:2002 is used in the presence of young children, the elderly or infirm.

This installation guide must be read in conjunction with the technical specifications for this appliance. If an optional log ignitor is being used, it must be installed in accordance with the relevant log ignitor installation guide.

The WD6 installation process consists of 6 steps

	Page	
Step 1: Ensure all components are correct and undamaged	3	
Step 2: Pre-installation checklist	4	
Step 3: Fit gather and firebox into cavity	5	
Step 4: Fit flue	6	
Step 5: Insert ashpan into firebox	7	
Step 6: Show owner how to operate appliance		
Operating Instructions	9	
Troubleshooting	9	
Warranty	10	

Information in this installation guide may be subject to change without notice.

Please ensure you have the current version before beginning installation.

If you have any queries, please contact 'The Fire Dept.' on 0800 888 550

Step 1: Unpack and ensure all components are correct and undamaged

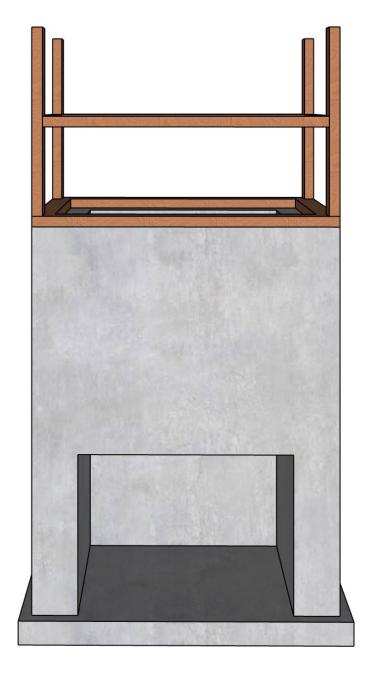

- Steel firebox.
- Ash pan.
- Cavity closer panel.
- Flue kit.
- WD6 technical specification (to be read in conjunction with this installation guide)

Version: April 2019

Step 2: Pre-installation checklist

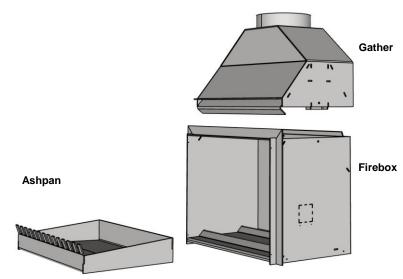

- Ensure cavity dimensions are correct refer to technical specification.
- Ensure hearth dimensions are correct refer to technical specifications.
- Plan flue path.

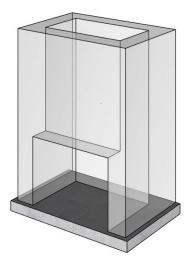

The starting point: Concrete and timber cavity.

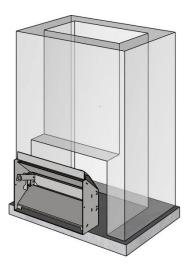

Step 3: Fit gather and firebox into cavity

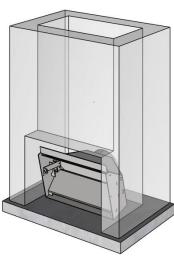

Remove ashpan from firebox and take the fire gather off firebox.
 x 10mm bolts at each side of the inside top off the firebox

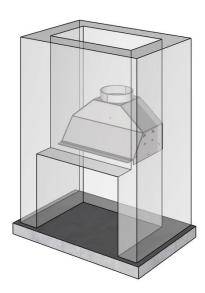

2. Double-check chimney cavity dimensions are correct.

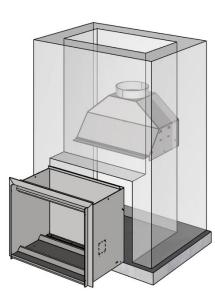

3. Lay the gather on its back in front of the cavity opening.

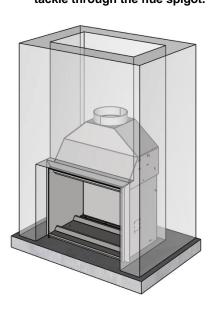

4. Slide the gather into the cavity opening and connect the block and tackle through the flue spigot.

5. Lift the gather into the cavity, allowing it to tilt into an upright position.

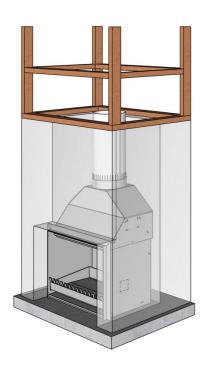

6. Slide the fire box into the cavity opening.

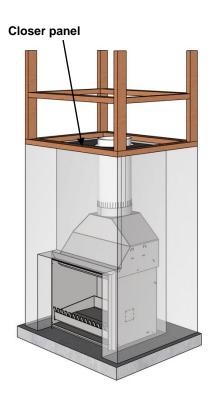

7. Lower the gather onto the fire box and bolt into position. 1 x 10mm bolt onto each top side of the firebox
Fix the fire box to the hearth. 1 x 5mm bolt/screw at the centre of each side of the base of the fire box.

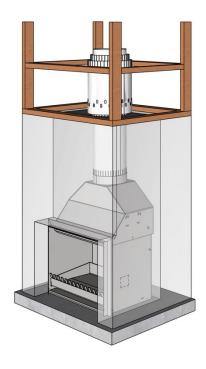

Step 4: Fit flue

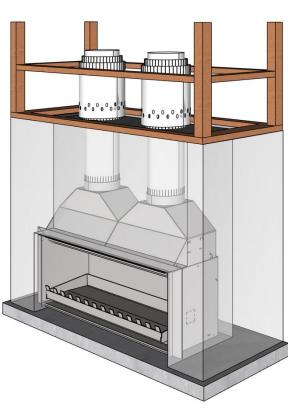

1. Run 300mm flue onto gather.

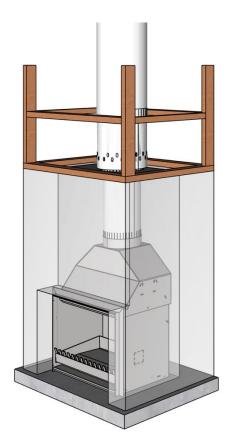

2. Fit closer panel.

3. Run the flue transition.
The flue runs into the firebox.
The inner casing runs into the cavity closer panel
The outer casing finishes 25mm above the cavity closer panel.

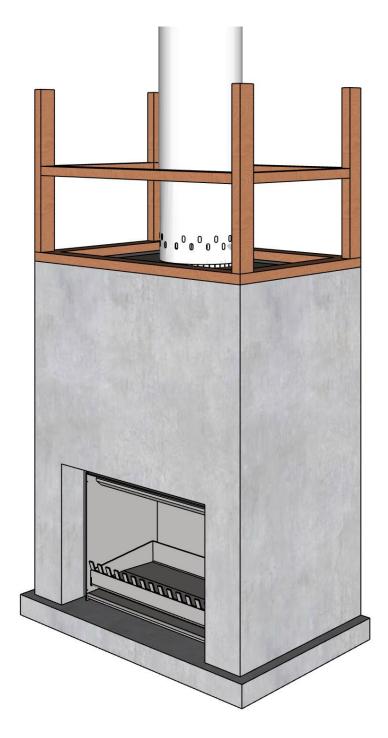

Note: The 1600mm wide model requires 2 x flues.

4. Complete the rest of the flue installation.

Step 5: Insert ashpan into firebox

Insert ashpan into firebox.

Appliance is now ready for customer-specified outer finishes.

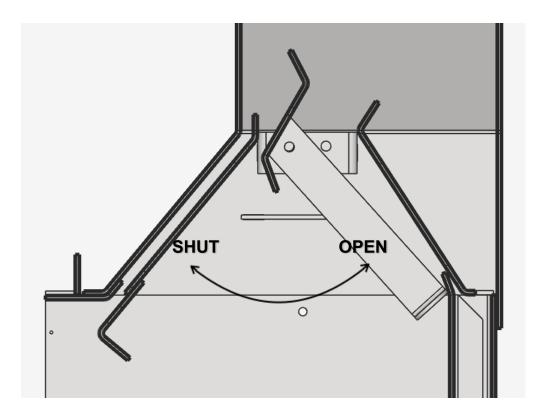

Step 6: Show owner how to operate appliance

- Following the Operating Instructions on the next page, show the owner how to operate the baffle, and if fitted, the log ignitor.
- If the owner is not available, leave this manual by the appliance.

OPERATING INSTRUCTIONS

- The WD6 has an integrated flue damper which has two positions open and closed.
- The flue damper MUST be in the open position when the fire is being used. To set the flue damper to the open position, simply push it to the rear of the fire.
- If the fire is not being used for an extended period (for example, over summer), the flue damper can be pulled forward to the closed position, which reduces external noises and drafts.

Ongoing maintenance. It is recommended that the flue be swept every year (some insurance
companies require this), or more often if required. Fire bricks will deteriorate over time and must be
regularly checked for cracking and movement. Repair or replace as required.

TROUBLESHOOTING

Problem	Probable Cause	Action
Smoke is entering room	 Poor quality or damp wood Flue damper is closed Draft flowing into or across fire Flue terminates at poor position outside (eg. windy part of roof) A nearby extractor fan is sucking smoke from the fire 	Change wood Open flue damper Remove source of draft Reposition flue termination Switch off or reposition extractor fan
Flue damper doesn't stay in open position	Flue dumper bolts have loosened	Tighten flue dumper bolts and locknuts – one of each side

PRODUCT WARRANTY

IMPORTANT: Evidence of original purchase is required for warranty service.

WARRANTOR: 'The Fire Dept.' (Landscape Elements Ltd)

85 Newton Road Mount Maunganui

PO Box 10275, Bayfair, Mount Maunganui

ELEMENT OF WARRANTY

'The Fire Dept.' warrants to the original retail owner for the duration of this warranty, it's fireboxes, gas burner tray, lighters, (herein after referred to as the Product) to be free from defects in materials and craftsmanship with only the limitations or exclusions set out below.

WARRANTY

This warranty will be deemed invalid if the Product is;

- (A) Installed by someone other than an authorised Fire Dept agent.
- (B) Not operated appropriately or "over-fired" in a manner resulting in the firebox operating excessively hot.
- (C) Not serviced and maintained by a certified gas fitter every 12 months.
- (D) Damaged by accident, neglect or misuse,
- (E) Repaired by someone other than an authorised Fire Dept repair agent for a defect or malfunction covered by this warranty.
- (F) Modified, altered or used as part of any conversion kits, subassemblies, or any configurations not sold by 'The Fire Dept.'.
- (G) The product contains fire bricks and has not been subjected to the recommended first start-up and run-in procedure.
- (H) Used in conjunction with any equipment or parts or as part of a system not manufactured or supplied by 'The Fire Dept.'.
- (I) External powder-coating within 200m of the high tide mark and not lightly washed with warm soapy water every three months.

Indoor appliances (Gas & Wood)

'The Fire Dept.'. warrants the mild steel firebox, galvanised steel outer skin and RHS Duragal steel support frame against defective materials and workmanship which would render it unfit for normal domestic use, from the date of purchase by the original consumer, for a period of 5 (five) years. Beyond normal heat-induced staining, tarnishing and mild warping, if a firebox, outer skin or support frame defect occurs, contact 'The Fire Dept.' and the defect will be repaired or replaced at our discretion with all costs covered.

'The Fire Dept.' warrants the SIT Pack (Gas regulator and controller) against defective materials and workmanship which would render it unfit for normal domestic use, from the date of purchase by the original consumer, for a period of 2 (two) years.

Components including fire medium, fans, tiles, glass and glass trim are warranted for a period of 2 (two) years from the date of original purchase, against defective materials and workmanship.

Outdoor appliances (Gas & Wood)

'The Fire Dept.' warrants the Mild Steel firebox, galvanised steel outer skin and RHS Duragal Steel support frame against defective materials and workmanship which would render it unfit for normal domestic use, from the date of purchase by the original consumer, for a period of 5 wording might need to be confirmed (two) years. Beyond normal heat-induced staining, tarnishing and mild warping, If a firebox, outer skin or support frame defect occurs, contact 'The Fire Dept.' and the defect will be repaired or replaced at our discretion with all costs covered.

'The Fire Dept.' warrants the SIT Pack (Gas regulator and controller) against defective materials and workmanship which would render it unfit for normal domestic use, from the date of purchase by the original consumer, for a period of 2 (two) years.

Components including fire medium, fans, tiles, glass and glass trim are warranted for a period of 2 (two) years from the date of original purchase for domestic use, against defective materials and workmanship.

STATEMENT OF REMEDY

In the event that the Product does not conform to this warranty at any time while this warranty is in effect, the Warrantor, at its discretion, will repair the defect or replace the part and return it to you without charge for parts or service. This warranty does not provide for reimbursement or payment of incidental or consequential damages.

This warranty does not in any way affect your rights under the Consumers Guarantee Act (New Zealand).
